

# INTRODUCING HOMER

The Mind-Controlled, Beer-Pouring Robot

# MIND CONTROL

Harness the power of your inner Jedi

Utilising EEG technology, we allow participants to pour a beer with the power of their mind.

We're able to ascertain how focused a participant is by tracking electropulse activity in their prefrontal cortex.

The game is simple. A fully focused mind delivers a perfect pint, however if you get distracted, your beer will suffer.

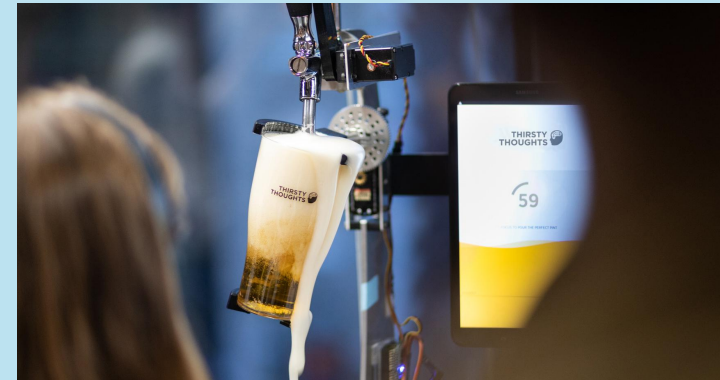

# ABOUT THIRSTY THOUGHTS

In 2019 we launched Thirsty Thoughts, our fleet of [mind-controlled, beer-pouring robots](#) which serviced the corporate events market. Initially created as a passion project for our founder, we found quick success on a global scale with our EEG integrated robots.

-  
In 2019, we:

- *Helped punters pour 114,000 pints with their mind*
- *Activated with 42 different clients in 14 countries, from Adobe in Athens, Blackrock in Barcelona and The Wall Street Journal in Washington*

# WE ARE ALSO BEER AFICIONADOS

Is there any end to the benefits?

We have been hard at work developing our very own delicious Pilsner, which we have aptly named Strange Pils! This will be our default beer on offer.

In addition to this, we can offer a selection of other familiar beer and cider brands which have been hand selected by us:

- Big Wave Golden Ale
- Deya Steady Rolling Man
- Tiny Rebel CLWB Tropicana
- Urban Orchard

At Thirsty Thoughts we believe that the amazing experiences our Modular Robot can offer should be complemented by an equally amazing beer!
